**Transactions of the London Mathematical Society**

An official journal of the London Mathematical Society. An open access journal with a wide scope, ranging from number theory to functional analysis and from quantum field theory to topology.

**Applied Mathematics Research eXpress**

Publishes research articles dealing with the use of mathematics in all areas of research, usually in the form of mathematical/computational models and algorithms.

**Proceedings of the London Mathematical Society**

An official journal of the London Mathematical Society. Publishes longer research articles that contribute significant research findings, with an emphasis on pure mathematics.

**International Mathematics Research Papers**

As of 2009, International Mathematics Research Papers has been incorporated into International Mathematics Research Notices. The journal published lengthy research articles of high topical interest in all areas of mathematics.

**International Mathematics Research Notices**

Publishes research articles of high current interest in all areas of mathematics. Articles are fully refereed and judged by their contribution to advancing the state of the science of mathematics.

**IMA Journal of Applied Mathematics**

### Mathematical Medicine and Biology: A Journal of the IMA

An official journal of the Institute of Mathematics and its Applications. Publishes original articles with a significant mathematical content addressing topics in medicine and biology.

### The Quarterly Journal of Mathematics

Publishes original contributions to pure mathematics. All major areas of pure mathematics are represented on the editorial board.

### International Mathematics Research Surveys

As of 2008, International Mathematics Research Surveys ceased publication. It published extensive survey articles on the state of research in all parts of mathematics emphasizing trends and open problems.

Edge Article

## Comparing interfacial cation hydration at catalytic active sites and spectator sites on gold electrodes: understanding structure sensitive CO<sub>2</sub> reduction kinetics

Jaclyn A. Rebstock, Quansong Zhu and L. Robert Baker

Site-specific vibrational probes were used to elucidate the interfacial solvation structure between catalytic active sites and inactive sites on a Au electrode to reveal a unique, opposing cation-dependent double layer structure at active sites.

The article was first published on 15 Jun 2022.

## ABOUT N-LIST

[Home](#) | [N-LIST](#)

### About N-LIST

#### Background

The Project entitled "National Library and Information Services Infrastructure for Scholarly Content (N-LIST)", being jointly executed by the e-ShodhSindhu Consortium, INFLIBNET Centre and the INDEST-AICTE Consortium, IIT Delhi provides for i) cross-subscription to e-resources subscribed by the two Consortia, i.e. subscription to INDEST-AICTE resources for universities and e-ShodhSindhu resources for technical institutions; and ii) access to selected e-resources to colleges. The N-LIST project provides access to e-resources to students, researchers and faculty from colleges and other beneficiary institutions through server(s) installed at the INFLIBNET Centre. The authorized users from colleges can now access e-resources and download articles required by them directly from the publisher's website once they are duly authenticated as authorized users through servers deployed at the INFLIBNET Centre.

#### N-LIST: Four Components

The project has four distinct components, i.e. i) to subscribe and provide access to selected e-ShodhSindhu e-resources to technical institutions (IITs, IISc, IISERs and NIIs) and monitor its usage; ii) to subscribe and provide access to selected INDEST e-resources to selected universities and monitor its usage; iii) to subscribe and provide access of selected e-resources to Govt./ Govt.-aided colleges and monitor its usage; and iv) to act as a Monitoring Agency for colleges and evaluate, promote, impart training and monitor all activities involved in the process of providing effective and efficient access to e-resources to colleges.

The INDEST and UGC-INFONET are jointly responsible for activity listed at i) and ii) above. The INFLIBNET Centre, Gandhinagar is responsible for activities listed at iii) and iv) above. The INFLIBNET Centre is also responsible for developing and deploying appropriate software tools and techniques for authenticating authorized users.

**Note:** From Year 2014, N-LIST programme is subsumed under e-ShodhSindhu Consortium as college component. The colleges (except Agriculture, Engineering, Management, Medical, Pharmacy, Dentistry and Nursing) in India are eligible to get access e-resources under N-LIST programme.

## USAGE STATISTICS

**Note:**

- The N-LIST Programme has implemented a new method for reporting usage statistics with the change in N-LIST Access Methodology from July 2021. The new usage statistics now include page views and unique sessions for each user of the college based on the logs generated from N-LIST.
- Usage statistics of users are updated in the first week of every month.

Start Month: 2021-07 | End Month: 2022-05 | Old Usages Format

roughly the same amount of average power and, more importantly, 3) power resources of all nodes are optimally shared, i.e., the lifetime of the network is comparable to an optimally designed network with  $L$  nodes whose total power is  $N \times P$ . We develop a theoretical framework for incorporation of random long range routes into wireless ad hoc networking protocols that can achieve such performance. Surprisingly, we show that wireless ad hoc routing algorithms, based on this framework, exist that can deliver this performance. The proposed solution is a randomized network structuring and packet routing framework whose communication latency is only  $L = O(\log^2 N)$  hops, on average, compared to  $O(\sqrt{N})$  in nearest neighbor communications while distributing the power requirement almost equally over all nodes. Interestingly, all network formation and routing algorithms are completely decentralized, and the packets arriving at a node are routed randomly and independently, based only on the source and destination locations. The distributed nature of the algorithm allows it to be implemented within standard wireless ad hoc communication protocols and makes the proposed framework a compelling candidate for harnessing collective network resources in a truly large-scale wireless ad hoc networking environment.

#### Coverage-time optimization for clustered wireless sensor networks: a power-balancing approach

**Source:** ACM Digital Library  
**Author:** Shu, Tao | Krunz, Marwan  
 Research | UG and PG  

In this paper, we investigate the maximization of the coverage time for a clustered wireless sensor network by optimal balancing of power consumption among cluster heads (CHs). Clustering significant! [View more](#)

#### Deploying sensor networks with guaranteed fault tolerance

**Source:** ACM Digital Library  
**Author:** Hajiaghayi, Mohammad Taghi | Bredin, Jonathan L. | Demaine, Erik...  
 Research | UG and PG  

We consider the problem of deploying or repairing a sensor network to guarantee a specified level of multipath connectivity ( $k$ —*connectivity*) between all nodes. Such a guarantee simultaneously provides fault tolerance against node failures and high overall network capacity (by the max-flow min-cut theorem). We design and analyze the first algorithms that place an almost-minimum number of additional sensors to augment an existing network into a  $k$ —*connected* network, for any desired parameter  $k$ . Our algorithms have provable guarantees on the quality of the solution. Specifically, we prove that the number of additional sensors is within a constant factor of the absolute minimum, for any fixed  $k$ . We have implemented greedy and distributed versions of this algorithm, and demonstrate in simulation that they produce high-quality placements for the additional sensors.

#### Measurement-based analysis, modeling, and synthesis of the internet delay space

**Source:** ACM Digital Library  
**Author:** Wang, Guohui | Ng, Tze Sing Eugene | Nandi, Animesh | Druschel, Pe...  
 Research | UG and PG  

Understanding the characteristics of the Internet delay space (i.e., the all-pairs set of static round-trip propagation delays among edge networks in the Internet) is important for the design of global-scale distributed systems. For instance, algorithms used in overlay networks are often sensitive to violations of the triangle inequality and to the growth properties within the Internet delay space. Since designers of distributed systems often rely on simulation and emulation to study design alternatives, they need a realistic model of the internet delay space. In this paper, we analyze

# THE TIMES OF INDIA

INDIA'S LARGEST ENGLISH NEWSPAPER

Observing that there's no substance in the ED's objection, a special PMLA court has allowed Salman Yash Birla to travel to the U.S. for work for two weeks

Cash-strapped Pakistan gov urges people to cut down the consumption of tea as sipping fewer cups a day will help reduce the import bill eating into the country's depleting foreign exchange reserves, P 11

India is insisting that countries that import wheat from it give a written assurance against re-export and use the grains only for human consumption. On Wednesday, the UAE ordered a four-month suspension in exports and re-exports of wheat & wheat flour originating from India, P 7

US Open will allow tennis players from Russia, like US Open defending champ Daniil Medvedev, and Belarus to compete this year despite the Russia-Ukraine war, which had prompted Wimbledon to ban those athletes, P 15

## Himachal judge's daughter held in 2015 murder case

The CII arrested Himachal HC judge's daughter, Kalyani Singh, on Wednesday in connection with the murder of a national-level shooter and advocate, SS Sidhu, alias Shipu Sidhu. Sidhu (50) was shot in a park in Chandigarh's Sec 27 in 2015. P 6

## SBI ups home loan rates by 50bps

SBI has hiked interest rates on home loans by 50 basis points to 7.5%. Axis Bank too has hiked lending rates and offers loans to its best customers at 7.6%. P 13

## 88% of migration intra-state in '20-21'

Data collected on migration for the first time found 88% of migrants moved within the same state in 2020-21. Within this, rural to rural was highest at 65%. P 6

## Didi suggests Gopal Gandhi or Farooq for Prez, but no call yet

Pawar is Oppn's Unanimous Pick, But He Declines

Moham Chatterjee @timesgrain.com

New Delhi: At a meeting attended by top leaders of 17 opposition parties here Wednesday over July's Presidential poll, names of Mahatma Gandhi's grandson and former Bengal governor Gopal Krishna Gandhi as well as National Conference president Farooq Abdullah cropped up as possible nominees after Sharad Pawar declared the offer to be the opposition's consensus candidate. Though the NCP chief emerged as the unanimous choice, he said he would prefer to be in active politics. TMC chief and Bengal CM

BJP seeks names but oppn says tell us yours first

Opposition minister Rajnath Singh and IJP chief JP Nadda on Wednesday spoke to key opposition leaders as well as Bihar CM Nitish Kumar and his Odisha counterpart Nareen Patraik to explore the chance of zeroing in on a consensus Presidential candidate. Singh reportedly wanted the leaders to suggest names of their choice, but since BJP hasn't put forth any name, the likes of Mamata Banerjee, Mallikarjun Kharge and Akhilesh Yadav remained "non-committal". The possibility of the emergence of a consensus appears remote with most opposition parties deciding to field their own candidates. P 9

## TOI remains India's most trusted news brand: Reuters Inst

The Times of India, the world's largest English language newspaper, has once again come out on top as the most trusted among major news media brands in India, according to a 45-country survey conducted by the Reuters Institute for the Study of Journalism (RISJ). It had topped the list last year too, with a trust score of 74 - the 2022 survey gives it an even higher 75. TOI stands head and shoulders above the rest - the next seven brands are clustered in a narrow band of 70 to 71. While there are no cross-country comparisons, TOI's immense trustworthiness can be gauged from the fact that the most trusted brand in the UK, BBC News, had a score of 36, and the most trusted paper in that country, the FT

Brand	Trust

New York Times	41

## 5G: Biggest spectrum sale from July 26

A India eyes transition to high-speed 5G telephony, the country is set to witness the biggest-ever auction of spectrum with the government putting up 12,000 MHz of mobile radio waves available - the largest such quantity being sold at one go. The government hopes that the auctions, which will begin on July 26, have a value of around Rs 43 lakh crore just at the reserve price. P 12

## Those in 'police' video are from Saharanpur: Kin

A few violence broke out in Saharanpur on June 10, a video showing some men being beaten by cops went viral. People being widely shared, officials maintained that it was "not from the area". TOI on Wednesday met the kin of those in the video, who confirmed they were indeed from Saharanpur. Many said
