LANGUAGE LAB [2016-17 To 2020-21]

The college has a well - functioned language lab that facilitates students to practice the language via computer-based exercises and activities. The language lab interactive courses provide a very different experience from the traditional system of teaching and learning English, offering more advanced features and functionalities. The lab offers the students a structured e- learning environment to practice English in an entertaining and interactive way to acquire the main language skills such as listening, speaking, reading, and writing. The effective use of the lab will enhance their active vocabulary and improve their proficiency in speaking the language.

The Language lab is powered by ETNL, equipped with computers Projector, Smart board with high speed internet facility, 40 head phone and audio-visual aids to refine the linguistic skills of the students. The lab can accommodate 40 students at a time and provide adequate facilities for effective teaching and learning of various aspects and skills of English language. Teacher in- charge of the Language Lab is Mr. M. A. Biradar and M. I. Biradar, Department of English.

WHAT IS A LANGUAGE LAB

Language lab software is designed to acquire language skills in an easy and interactive way. English Language lab is based on the methodology of LSRW skills that are listening, speaking, reading and writing. These language laboratories are mainly an educational platform for students to learn and understand the basics of a language in a structured way. Digital language lab allows a student to interact, study, experiment with the language skills in a practical manner. It is not a theoretical based concept. As much as the student speaks the language he will be able to resolve its doubt.

English Language lab focuses on language skills and efficiently develops the skills in students. Language lab software is used in schools and colleges across the country. In language lab software is a blend of technology that helps in easy and fast learning of English skills. English is a language based on concepts and it is important to understand these concepts and learn them.

WHAT ARE THE BENEFITS OF LANGUAGE LAB!

Language lab software is software based on learning a language. Good communication depends upon the language skills one acquires while learning a language. If the four skills of language that are reading, writing, listening and speaking are practiced well. Language lab plays an important role in the language learning process.

English Language Lab software helps in learning the English language in an effective way. It provides technical tools for the students to learn the pronunciation of language in an easy way. It helps in learning the basic skills of the English language. Students learn in an easy way through interactive videos.

ENGLISH LANGUAGE LAB

Language Lab software is a classroom based solution which will be installed on the computer in classroom and the content can be accessible in the respective classroom system. English Language becomes the default option for communication as it is spoken and understood across the global. Hence making it a good companion for travel enthusiasts. While proficient English-speaking skills appeals your resume and it can boost hiring

Co-ordinator,

Internal Quality Assurance Cell

potential. A recent survey by LinkedIn stated that CEOs and HR Directors prefer English speaking employees over other languages.

English Language is not the first language for many Indians and it's a language ought to be learned. It is only taught in few English medium schools across the country; hence, a huge chunk of population never got the opportunity to learn English language.

How Digital English Language laboratory can help your learning process?

- First and foremost, as it is a digital Laboratory platform, it is available to everyone and can be easily accessed from any location. Hence reaching a wider range of audience.
- To learn a English language, one needs constant practice. This software works for the overall development of the learner and enhances the ability to Listen, Speak, Read and Write.
- It provides with digital English Language Laboratory tools designed exclusively according to the needs of English learners.
- It allows the teacher to monitor the activities of the student, thus, teacher is the controlling authority and can guide the students. The teacher can conduct online tests and generate reports.
- It allows full control over the course structure. One can create, organize and manage content according to their own convenience.
- English Language Lab An in-built voice recording feature is available for exercise and text.
- Notice board facility is provided in the software where all important notifications are grouped in together and alerts the learner about his/her progress.
- Batch Management system allows the learner to choose their own batch.

Why use Language Lab to Teach at English?

A teacher teaches a class of around 40 students in a 45-minute-long period. Each student gets very less time to practice speaking English in one class. While the teacher is burdened with finishing a large syllabus in short time, she is unable to provide with the needs of each child.

With English Language labs, all students in the class can speak and practice simultaneously without distracting each other regardless of the class size. Language lab gives an opportunity to work on individual needs, which is difficult to be achieved in a classroom setting.

Similar is the example of CBSE tying up with Trinity College, London for the ASL Project to test speaking and listening skills of the learners in classes IX and XI. However, the project only involved few components of a language lab.

A school meets the hardware, software and human resource requirements to set up a digital language lab. The school's computer lab can be integrated a language laboratory. Inclusion of LSRW will make learning English more interactive and fun for the students. Content will be available as pictures, sound, texts and video and the teachers can adjust materials to fit the necessity of the students. The teachers will also have the authority to track the performance of each student time-to-time.
