B.Sc. V Semester (w.e.f. 2019 - 20)

Botany Paper - I

Paper-I: Plant Breeding, Tissue Culture and Horticultural Practices.

Hrs

Unit I: Plant Breeding: History and objectives. Introduction, Selection (Pure line, Mass Selection), Hybridization- inter specific and inter generic. Mutational & Polyploidy breeding. Germ plasma and its maintenance. Pollen Bank, Quarantine method.

10 Hrs.

Unit II: Plant Tissue Culture: Scope and Significance. Basic Aspects and Cellular totipotency (Shoot tip, Embryo and Haploid culture techniques). Differentiation and morphogenesis.

10 Hrs.

Unit III: Introduction to Horticulture, Nursery management and importance.

Methods of propagation - vegetative - rhizome, bulb, corm and sucker (natural). Artificial - layering, grafting and budding. Bonsai - methods and importance. Nursery management: Introduction, types of nurseries and cultural practices. Seed (propagule) collection, storage and treatment. Manures, fertilizers and pesticides. Methods of irrigation - drip, sprinkler and flood.

12 Hrs.

Unit IV: Green House Technology - Introduction, advantages and limitations. Types of Green Houses- Green House structure, principle Greenhouse technology as applied to ornamental, vegetable and fruit plants.

08 Hrs.

Unit V: Harvest Technology and Weed Management: Harvest Technology: Flower and fruit plants management. Artificial ripening, maturity indices, methods of picking. Post-harvest technology and management of fruits: grading, processing, storage and packing. Weed Management: Introduction and significance. Invasive weeds - concept and causes of their dominance. Weed control - physical, chemical and biological methods.

10 Hrs.

Practicals

1. Study of methods of propagation with help of tubers, bulbs, rhizomes, corms, suckers, runner and offset.
2. Study of propagation by cutting, layering, grafting and budding.
3. Methods of emasculation and bagging for cross-pollination.
4. Morphology and anatomy of dry and wet stigma.
5. Morphology and anatomy of solid and hollow styles.
6. Study of pollination types.
7. Demonstration of tissue culture techniques.
8. Visit to nursery - poly house /Green house and tissue culture lab.
9. Preparation of MS media for culture.
10. Bonsai techniques.

The Important Benefits of Composting

Can Save Money. Composting it is a natural and organic process. ...

Good for the Soil. It can be quite helpful for the overall health of the soil. ...

Reduces Garden Pests. ...

Improves Soil Structure. ...

Ideal Exercise. ...

Recycles Home Waste. ...

Good for the Environment. ...

Conserves Water.

Soil Benefits of Using Compost

- Compost Feeds the Soil Food Web.
- Reduces the Need for Chemical Fertilizers.
- Compost Increases Soil Moisture.
- It Prevents Soil Erosion.
- It Aids Plant Growth.
- Composting Improves Plant Nutrition.
- It Can Reduce Plant Mortality Rates.
- Composting Reduces Waste.

Advantages of dairy farming business

The initial investment in dairy farming business is low in comparison to other Industry.

It is environment-friendly. ...

The demand for milk product is increasing rapidly.

Cow dung is good organic manure it increases soil fertility.

Cow dung can be used for the production of biogas.

Apart from being an important sector globally, dairying is equally important in developing economies like India, for providing nutrition support, reducing rural poverty, inequity, ensuring food security for millions of rural households, and enhancing economic growth, particularly in rural areas.

Sub: Request for permission to visit Krushi Vidyapeeth regarding.

Dear Sir,

We are very happy to know that your Krushi Vidyapeeth is providing the practical knowledge about Organic Farming, Soil, Soil Composition, Soil Conservation and Soil Analysis with the modern instruments to farmers. The activities of vidyapeeth are really helpful to our B.Sc-VI Semester Chemistry optional students as the University introduced the 'Soil Analysis' as a syllabus. The chapter covering about Soil, Soil Composition, Soil fertility, Soil nutrients and determination of soil nutrients. Hence as a part of Curriculum the students and staff are planned to arrange a Field Visit to your Krushi Vidyapeeth. The Field visit will help our students to learn about Soil at the spot practically with interaction and hence made clear the theoretical aspects of the chapter what they have learnt in the class room. Above all the visit helps in developing field concepts, fosters a sense of team work. Hence we are kindly requesting you to grant permission for our students and staff to visit your vidyapeeth on 28.08.2021

Hoping for your early and positive response.

Thanking you.

Dear Sir,

We are pleased to inform you that your college Field visit team of 23 students and 3 Faculty members visited our Krushi Vidyapeeth today 28-08-2021. The team entered the vidyapeeth at 11:15 am. The president, members of the vidyapeeth and soil analysts shared the knowledge and practical aspects of soil and soil analysis. The students involved actively with great interest in all the activities and interacted. The Team of Field visit left the Vidyapeeth at 4:15 pm.

Thanking You.

REPORT OF FIELD VISIT

(DEPT ACTIVITY 2020-21)

Visit to a field is an effective method of learning through participation. The visit experience goes beyond reading about a concept; students are able to see it at the spot, manipulate it, record the details of observations, interact physically. Visiting a farm and milking a real cow is much more effective than reading about milking cow. There are plenty of opportunities to incorporate the field visit/trip experience back into classroom steady.

Department of Chemistry organised a field visit to Parappa Master Savayava Krushi Vidyapeeth, Basarakod for B.Sc-VI Semester Chemistry optional (Practical Batch-3) students on 28.08.2021. The vidyapeeth is 11 km away from the Muddebihal city. The purpose of the field visit is to know about soil, soil composition, soil fertility, soil nutrients, determination of soil nutrients and organic farming. The 'Soil Analysis' chapter introduced as a syllabus for B.Sc-VI Semester students in the chemistry optional subject is covering all the above said concepts/contents. This unit studied theoretically in the classroom can be studied practically during the visit.

With the prior permission of principal and the president of Krushi Vidyapeeth, the Team of 23 students and 3 faculty members started the journey from college campus at 11 AM through a private vehicle and reached the vidyapeeth around 11:15 AM. At the very beginning of the visit, the Team met the vidyapeeth president, youth awardee and leader of progressive farmers shri. Aravind. Koppa. The president welcomed the Team and interacted for a few minutes. Then took the team in and around vidyapeeth and explained in detail about soil, soil composition, soil fertility, soil conservation, soil nutrients and organic farming. He also highlighted the problems of farmers who visiting the vidyapeeth and strongly suggested not to use more chemical fertilizers for greater crop productivity and to avoid the soil pollution. Also showed the various methods adopted for increasing the soil nutrients. Later the soil analysts shri. Santosh. R. Naik and shri. Mahantesh. P. Naregal from Hitnalli farm took the team to laboratory and gave the information about different equipments used for soil analysis. Then explained the determination of soil nutrients using the instruments. These practical aspects made clear the topic of soil analysis which the students have learnt in the classroom. Students interacted with soil analysts and president. All the queries raised by students were satisfactorily solved. After the interaction and discussion a function was arranged in which the president shared the thoughts of organic farming and students expressed their opinions and benefits of this visit. Later Smt and shri. Aravind .Koppa, of vidyapeeth provided the meals to all the students and faculty. Thus a good hospitality by the vidyapeeth right from beginning to end of our programme. Lastly the faculty proposed vote of thanks to the president, members of vidyapeeth, experts who helped during the visit. The team left vidyapeeth at 4 pm and reached the Muddebihal around 4:30 pm.

The visit/event helps in developing field concepts and processes through direct personal experiences, also in understanding correlation between mankind and environment. The event also fosters a sense of teamwork and community among the students as they experience a field visit together. Field visit to organic farming is 'seeing is believing' The visit was more informative, innovative and was also a memorable to students.
